

**EveryOne Home strategies working to decrease literally homeless;
Recession causing spike in hidden homeless**

Literally Homeless

People who are residing on the streets, places not meant for human habitation, in shelters or in transitional housing programs decreased by 10% since 2007, from 4,838 to 4,341.

- Since 2003, the literally homeless population declined by 15%.
- Every region of the County showed a reduction of literally homeless families with minor children.
- The total population remained fairly flat from 2003 – 2005, with major gains beginning in 2005, showing a 6% reduction in 2007, and a 10% reduction in 2009.

Chronically Homeless

Countywide, 231 chronically homeless unaccompanied, disabled people moved off the streets and out of shelters into permanent supportive housing and other permanent housing since 2007 – a reduction of 18%. The current chronically homeless population is 1,026.

- This year's decrease was the largest ever in the County, far exceeding the 3% reduction from 2005 to 2007.
- Berkeley and Oakland both showed marked reductions.

Hidden Homeless

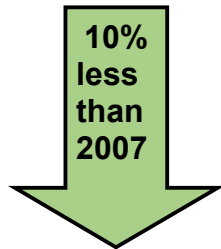

Since this data was last collected in 2003, the number of hidden homeless (living temporarily with a friend or relative, in a motel, or facing eviction within seven days) has increased by more than two and a half times.

- From January 2003 to January 2009, the point-in-time hidden homeless population increased from 1,134 to 3,042 people.
- The hidden homeless population is three-quarters as large as the literally homeless population.

LITERAL HOMELESSNESS SUPPLEMENT

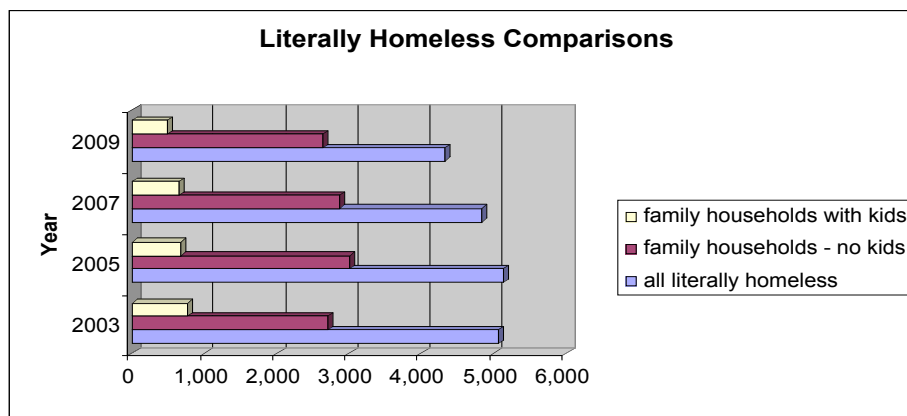

People who are living on the streets, in places not meant for human habitation, in shelters or in transitional housing programs.

Literally Homeless

2009 data depicts a continued trend of reducing the number of people literally homeless.

- In general the trend also shows a reduction in households with and without children.
- The number of literally homeless children reduced by 33% since 2003 (from 1477 down to 994).

Regional Data

- Families with children that are literally homeless showed decreases in every area of the County ranging from 6.5% reduction in Berkeley to a 43.4% reduction in the South and East combined portion of the County.
- Compared to 2003, households without children make up an increasing proportion of the literally homeless. This was true in every area of the County except Berkeley.

Reasons for the Decreases

- Many emergency shelter programs now emphasize a “housing first” approach which prioritizes finding people permanent housing by the end of their shelter stays.
- Affordable housing developers have built 125 units of permanent housing targeted to the homeless including Lorenzo Creek (32 units in Castro Valley), Madison at 14th (20 units for transition age youth in Oakland), and Carmen Avenue (30 units in Livermore). See the permanent supportive housing handout for complete list.
- Alameda Point Collaborative and others have converted dozens of transitional housing units to permanent affordable housing wherever possible.

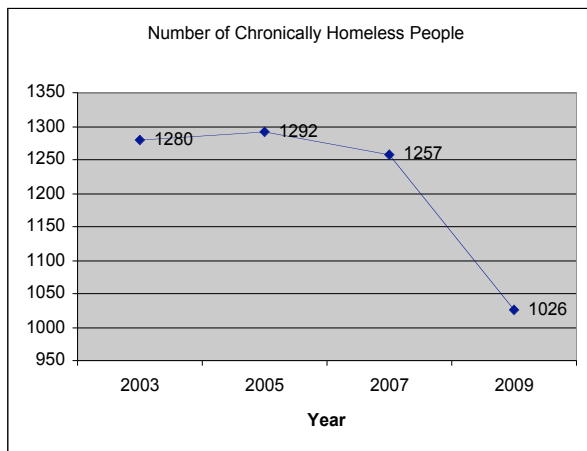

CHRONIC HOMELESSNESS SUPPLEMENT

Disabled, unaccompanied individuals who are living on the streets, in places not meant for human habitation, or in shelters and have been homeless for a year or more or have had four or more episodes of homelessness in the past three years.

Chronic Homeless

- A reduction in the number of people who are chronically homeless has been occurring since 2005, with a dramatic reduction between 2007 and 2009.
- Chronically homeless people are 31% of the literally homeless population, up from 25% in 2003.
- Nearly half of the “street homeless” sleeping outside or in places not meant for habitation are chronically homeless (46%).

Year	2003	2005	2007	2009
Number of people	1280	1292	1257	1026
Percent change from prior year		+ 1%	- 3%	- 18%

Regional Data

- Berkeley has seen the largest decrease in the number of chronically homeless disabled individuals – a 48% decrease (253 people)! Oakland has also realized a reduction in chronically homeless disabled individuals of 16% or 99 people.
- Decreases in Berkeley and Oakland were offset by increases in South and East County(+12) and Mid- and Other-north County (+86).

Reasons for the Decrease

The intensive efforts of new programs to identify engage and serve the chronically homeless combine street outreach and direct access to permanent housing through vouchers funded by the Mental Health Services Act, Federal Shelter + Care, and Berkeley General Fund. For example:

- Frequent Users Project, focused on high users of emergency health care in North County, includes 21 dedicated vouchers.
- Full Service Partnerships support 270 vouchers for chronically homeless persons with serious mental illness throughout Alameda County.
- Square One in Berkeley uses parking meter funds to create 10 housing vouchers.

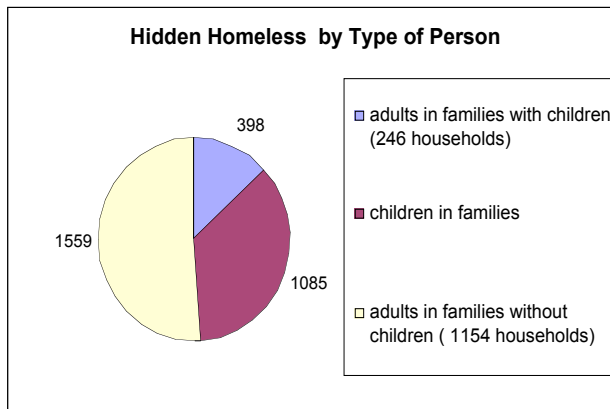

HIDDEN HOMELESSNESS SUPPLEMENT

Households with and without children who are living temporarily with friends, relatives, or in a motel who do not have the resources to move into housing and have been notified that the situation is short-term; or households who are facing eviction within 7 days. These people meet the newly expanded federal definition of homelessness, in the HEARTH act, authorized earlier this year.

Hidden Homeless

- Children are the most dramatically increased hidden homeless subpopulation, a 290% increase from 278 to 1,085 since 2003.
- Family size is the largest in hidden homeless with an average of 4.4 people per household compared to 2.9 people per household in the literally homeless population.
- Hidden homeless families have less than half the average monthly income as sheltered homeless families (\$632 hidden homeless vs. \$1,220 sheltered homeless).

The hidden homeless population is
49% households with minor children
and
51% households without children.

Regional Data

- Oakland has the largest number of additional hidden homeless people – up 252% to 2,132 people. This represents 70% of the countywide total hidden homeless persons.
- Households without children were the largest increase of hidden homeless in the South, East, Mid and Other North areas of the County.

Reason for the Increase

Housing instability has increased dramatically because of the recession. Food banks, soup kitchens, and food stamp programs are all reporting increased demand, but as of January 2009, we had not yet seen the numbers of persons in shelters and on the streets go up. Research shows that people rarely go directly from their own housing straight to the streets or a shelter. They first double up with friends and family, stay in motels and campgrounds, work hard to get back on their feet - entering shelters or the streets only as a last resort. The hidden homeless will join the literally homeless unless we act swiftly and effectively to:

- Provide well publicized, easily accessible housing resource centers,
- Appropriately identify the neediest households likely to be literally homeless,
- Rapidly deploy new and expanded prevention programs.

How Does This Data Guides Our Future Efforts

The 2009 Homeless Count proves that the strategies outlined in the EveryOne Home Plan to end homelessness are working. We need to continue our investments in them. We must also address the spike in hidden homelessness with the same innovative, multi-jurisdictional, cross-sector collaborative approach that has helped hundreds of chronically homeless individuals and literally homeless families return to permanent housing.

Continue to invest in what works

EveryOne Home and its partners will:

- Support and expand direct access to housing and Housing First programs that are successful in getting homeless individuals and families off the streets and out of shelters.
- Continue to build permanent supportive housing units.
- Expand the number of permanent housing subsidies available.
- Maintain a balanced approach to housing chronically homeless, singles and families so that we continue to see reductions in all areas.
- Focus on ending homelessness rather than managing it.

Address hidden homelessness with new federal resources

EveryOne Home and its partners will:

- Implement the EveryOne Home Prevention and Rapid Rehousing Program using new federal stimulus dollars. For more details go to www.everyonehome.org.
- Use this new countywide Homelessness Prevention and Rapid Rehousing Program to improve and expand homelessness prevention activities so that they reach the hidden homeless and those most at risk of becoming literally homeless.
- Rapidly re-house those who have become homeless.
- Track outcomes and evaluate results.

For more information about the Alameda County Homeless Count 2009 or the new Prevention and Rapid Rehousing Program visit our website at www.everyonehome.org.

Homeless Count 2009 Design

The 2009 Alameda Countywide Homeless Count was designed to produce **point-in-time estimates** of the prevalence of three mutually exclusive groups of households and persons in Alameda County:

- (1) **Literally Homeless**--those residing in shelters, transitional housing, on the street, or other places not meant for human habitation
- (2) **Hidden Homeless**—those residing on a temporary basis with friends or relatives (couch surfers), or in motels, or within 7 days of being evicted, and
- (3) **Housed**--but relying on services such as hot meal sites, food pantries, and drop-in centers.

The Count also yields an estimate of the number of people defined as chronically homeless as well as those restricted by one or more disabilities.

Two types of data comprise the 2009 count estimates:

(1) data from the InHOUSE Homeless Management Information System and program administrative data enumerating the number and characteristics of persons residing in shelters and transitional housing programs the night of January 26, 2009, and

(2) survey-based population estimates of the number and characteristics of unsheltered persons, persons in temporary situations, and housed persons relying on services.

Administrative data and survey results are deduplicated and combined in many tables and reweighted to generate countywide and regional population estimates.

The survey is based on a stratified, two-stage cluster sample of 1251 individuals at service sites. Survey sites were selected randomly from a sampling frame (list) of facilities known to provide services to homeless adults and youth, categorized by service type and region of the county. On January 27, 2009, all customers being served at 27 meal service sites, food pantries, drop-in centers, and outreach programs throughout Alameda County were asked to participate in the survey.*

Trained volunteers interviewed English-speaking adults or emancipated youth about housing status, duration of homelessness, disabilities, and what would help most. Responses were recorded anonymously. Interviews lasted about ten minutes per respondent. The response rate overall was 65 percent and 71 percent for English-speaking customers. Over 90 percent of non-responses other than because of language barrier were for one of three reasons: refused, not enough time, or not available when an interviewer became free.

Data is presented by service sites in seven regions of the county:

- Oakland
- Berkeley
- Other North (cities of Alameda, Emeryville, Piedmont, and Albany)
- Mid (cities of San Leandro, Hayward, Castro Valley, & mid-County unincorporated areas)
- South (cities of Fremont, Newark, Union City, Sunol, and related unincorporated areas)
- East (cities of Pleasanton, Dublin, and Livermore)
- Countywide (all cities and regions)

*(In one large service site, selection of individual clients for interview was carried out by systematic random selection, applying a fixed interval to the queue of persons being served, after a random start.)

HOMELESS COUNT 2009 SURVEY

INTERVIEWER INITIALS: ___ ___ ___

INTERVIEWER READ TO RESPONDENT:

Hello, my name is _____, and I'm a volunteer with Alameda County EveryOne Home.

We won't ask your name or other identifying information, and all of your responses are strictly confidential. Your honest response is important to help us keep the housing funds we have for Alameda County. Your participation is voluntary. You may stop the interview at any time, or refuse to answer any questions that make you uncomfortable.

If it's OK, I'll start the questions now. I need to read each one all the way through.

I will start by asking about meals you ate at service sites in the last week.

- 1 In the last 7 days, how many days did you have breakfast at a soup kitchen or public dining room, but not at a shelter where you stayed? ___ **DAYS**

 - 2 How many of the last 7 days did you have lunch at a soup kitchen or public dining room, but not at a shelter where you stayed? ___ **DAYS**

 - 3 How many of the last 7 days did you have dinner at a soup kitchen or public dining room, but not at a shelter where you stayed? ___ **DAYS**

 - 4 In the last seven days, how many days did you go to a food pantry? That's a place where you get a bag or a box of food to take away and prepare later. ___ **DAYS**

 - 5 Over the last seven days how many days did you go to a drop-in center or a multi-service center? That is, a place where you can talk to someone, get a cup of coffee, pick up messages, and use a phone, but not stay overnight. ___ **DAYS**

 - 6 Over the last seven days how many days did an outreach worker offer to help you? Outreach workers are people who come to you at outdoor locations to hand out blankets or food, see if you are okay, or offer help. ___ **DAYS**
-

HOMELESS COUNT 2009 SURVEY

7. Where did you stay last night [THE NIGHT OF JANUARY 26]?

<input type="checkbox"/> a. The streets, a vehicle, an abandoned building, bus/ train/ subway station/ airport, anywhere outside , or other place not meant for human habitation

Benefits of Permanent Supportive Housing

Residents increase their ability to access and maintain housing and

- More than 80% stay housed for at least one year.

Reduce their use of crisis and institutional services

- ER visits down 57%
- Emergency detox services use down 85%
- Incarceration rate down 50%

What is Permanent Supportive Housing

Taken from the Corporation for Supportive Housing website: www.csh.org

A Better Approach

Supportive housing is a successful, cost-effective combination of affordable housing with services that helps people live more stable, productive lives. The effectiveness of supportive housing in ending homelessness has depended upon a willingness to take risks and experiment with new models, approaches, and strategies.

A supportive housing unit is defined by the following elements¹:

- The unit is available to, and intended for, a person or family whose head of household is homeless, or at-risk of homelessness, and has multiple barriers to employment and housing stability, which might include mental illness, chemical dependency, and/or other disabling or chronic health conditions;
- The tenant household ideally pays no more than 30% household income towards rent and utilities, and never pays more than 50% of income toward such housing expenses;
- The tenant household has a lease (or similar form of occupancy agreement) with no limits on length of tenancy, as long as the terms and conditions of the lease or agreement are met;
- The unit's operations are managed through an effective partnership among representatives of the project owner and/or sponsor, the property management agent, the supportive services providers, the relevant public agencies, and the tenants;
- All members of the tenant household have easy, facilitated access to a flexible and comprehensive array of supportive services designed to assist the tenants to achieve and sustain housing stability.
- Service providers proactively seek to engage tenants in on-site and community-based supportive services, but participation in such supportive services is not a condition of ongoing tenancy.
- Service and property management strategies include effective, coordinated approaches for addressing issues resulting from substance use, relapse, and mental health crises, with a focus on fostering housing stability.

A Range of Housing Models

While there may not be a single perfect model, there are a number of preferred housing models for supportive housing. The housing setting will vary dramatically and be based on a range of factors including the tenant's preference, the type of housing stock available, and the norms and history of a local community's real estate market, and might include:

- Apartment or single-room occupancy (SRO) buildings, townhouses, or single-family homes that exclusively house formerly homeless individuals and/or families;
- Apartment or SRO buildings, or townhouses that mix special-needs housing with general affordable housing;
- Rent-subsidized apartments leased in the open market; and
- Long-term set-asides of units within privately owned buildings.

CHARACTERISTICS OF THE HOMELESS POPULATION: 2009

Note: Disabilities are very common among Alameda County's homeless adults. 71% of those living on the street or in another place not meant for human habitation have one or more disabilities, including physical disabilities as well as the types of disabilities shown here.

% Reported income amount	192	64.1	81.9	72.5	87.4	81.9	86.3
Average monthly income, if any	192	\$ 1,220	\$ 631	\$ 903	\$ 632	\$ 723	\$ 1,118
Adult-only households	Sample n unwtd.	185	371	556	195	751	279
2. Adult service users <u>not living with</u> minor children	1030	982	1541	2523	1559	4082	3603
% Missing income data	55	1.7	7.0	4.9	2.1	3.9	1.9
% Reported "No income"	165	10.2	25.8	19.7	9.2	15.7	5.9
% Reported income amount	810	88.1	67.2	75.4	88.6	80.4	92.2
Average monthly income, if any	808	\$ 764	\$ 590	\$ 669	\$ 800	\$ 724	\$ 1,030

* Reported income sources and amounts were asked, and generally reported, as individual monthly income. Nevertheless, some sources, such as CalWORKs, are received for others (minor children) in the household.

INCOME - Data Highlights

1) *Average income patterns for families with children indicate an important role for prevention and rapid re-housing services.* Housed families with children who use emergency services have virtually the same average income as sheltered families with children. Families who are “couch surfing” or are at imminent risk of eviction have 57% of the housed families’ average income, and those who are unsheltered homeless have slightly more than 50% of those who are housed.

Families Average Monthly Income for those Reporting Income	Housing Status
\$ 631	Unsheltered
\$ 1,220	Sheltered
\$ 632	Other homeless situations
\$ 1,118	Housed

- a) A reduction in income raises the risk of a housing crisis, suggesting short and medium term rental subsidies for a family recovering their income can maintain housing stability and prevent families with children from ending up on the streets.
- b) Many families in shelters have income levels to support housing and could benefit from rapid re-housing strategies.

2) *Income levels for adult-only households correlate with housing status.* For homeless single adults and couples without children in their care, increased income directly relates to increased housing stability, suggesting services focused on increasing income through employment or benefits advocacy are needed for this population as well as a need for housing affordable at the lowest income levels.

Average Monthly Income	Housing Status
\$ 590	Unsheltered
\$ 764	Sheltered
\$ 800	Other homeless situations
\$ 1,030	Housed

INCOME - Other significant findings

- For adult-only households, nearly 26% of unsheltered adults reported no income, while that percentage decreased in more stable housing situations.

% Adult-Only Household Members With No Income	Housing Status
25.8 %	Unsheltered
10.2%	Sheltered
9.2%	Other homeless situations

	These columns contain HMIS data, as reported by shelter providers and are considered counts, not estimates
	These columns contain estimates generated from survey data, unless otherwise identified. The number of children in a household was truncated at 5, affecting only a few table cells. Survey-based averages are not computed within the spreadsheet itself but are imported from a statistical analysis that incorporates weighting factors.
	These columns contain combined HMIS and survey data, weighted appropriately. As a result they constitute estimates. Total estimated service users does not include minor children.

The survey found very few unsheltered persons with minor children, and, by "chance," they reported very large households, containing multiple adults (or children over age 17). "Chance," in this case may involve factors such as the specifics of what type of customers use particular services on the day of the count. To deal with small sample size, averages in these cells are calculated similarly to the administrative data for sheltered persons.

Hidden homeless = in hotel, motel, with friends or relatives on a temporary basis where arrangement is short term; or being evicted from housing within 7 days.

Definitions and Crosswalk of Housing Status

Literally Homeless = sleeping on the streets or other place not meant for human habitation, staying in a shelter or a transitional housing program. Formerly "HUD Homeless" from 2003 - 2008.

Hidden Homeless = being evicted within next 7 days, staying in a hotel or motel on a temporary basis, or staying with a friend or relative on a temporary basis having been notified that the arrangement is short term and with no other financial resources to relocate. Formerly a subset of the 2003 - 2008 "Community defined Homeless"; equals the "additional homeless" added to the HUD Homeless to obtain the Community Defined Homeless. Now included directly in the HUD definition of Homelessness per the HEARTH Act reauthorization of McKinney Vento Programs signed by President Obama in May 2009.

Total Homeless = total of combined "Literally Homeless" and "Hidden Homeless". Formerly "Community defined Homeless" in 2003 - 2008. Now expanded as the HUD definition of Homelessness per the HEARTH Act reauthorization of McKinney Vento Programs signed by President Obama in May 2009.
